Institute of Physics
of the Czech
Academy of Sciences

Invitation

to the seminar of Division of Elementary Particle Physics of the
Institute of Physics of the Czech Academy of Sciences

Jana Faltová

Faculty of Mathematics and Physics,
Charles University

Physics @ FCC-ee

Abstract: The Future Circular Collider in its electron–positron stage (FCC-ee) is a proposed next-generation particle physics facility focused on precision measurements of the Z, W, Higgs, and top sectors. The seminar will discuss the scientific motivation for building such a large-scale collider, its physics potential, and experimental challenges associated with future high-precision measurements.

When: Thursday, May 28, 2026 at 2PM

Where: Dvořák hall, FZU, Pod Vodárenskou věží 1, Prague
